

Number	Algebra	Data Handling	Shape	Random														
Decrease £240 by 15%	Simplify $2t^2 \times 5t^4$	This table shows the frequency of the number of goals scored in a month of shinty. What is the modal number of goals scored that month? <table border="1" data-bbox="1122 304 1301 453"> <thead> <tr> <th>Number</th> <th>Frequency</th> </tr> </thead> <tbody> <tr><td>1</td><td>14</td></tr> <tr><td>2</td><td>13</td></tr> <tr><td>3</td><td>9</td></tr> <tr><td>4</td><td>34</td></tr> <tr><td>5</td><td>11</td></tr> <tr><td>6</td><td>19</td></tr> </tbody> </table>	Number	Frequency	1	14	2	13	3	9	4	34	5	11	6	19		Write this number as a fraction: $0.\dot{2}$
Number	Frequency																	
1	14																	
2	13																	
3	9																	
4	34																	
5	11																	
6	19																	
Calculate the value of: $\sqrt{144}$	Solve: $\frac{h+9}{4} = 2$	The probability of a spinner landing on a two is 0.2. If the spinner is spun 150 times, how many times would you estimate not to get a two?	Rotate triangle EFG 90° clockwise about the origin.															
Given that $238 \times 5967 = 142014$ Write down the value of $1420.146 \div 59.67$	Expand and simplify: $(y+2)(y+6)$		Calculate the size of angle x. Give reasons for your answer.  x =	Simplify: $\frac{x^2 - 5x + 6}{x - 2}$														
Write down the reciprocal of (a) 5 (b) $\frac{1}{4}$ (c) 0.3	Solve: $\frac{5+4m}{4} = \frac{4-m}{2}$	a) What was the median mark? b) What was the lowest mark? c) Estimate how many students scored 12 or less marks d) Estimate the interquartile range	Calculate the interior angle of a regular hexagon	$x + 3y = 22$ $x + y = 10$
